Question A:
 I don't think trying to fit them around the
 hole for a motor is a good idea. I would rather
 try to get the motor itself in other direction.
 Don't see.

Question B:
 I agree with your direction.
 I think you have
 the design for the robot family.
 I think you have a piece of
 design. I think
 as a result
 the I think you have a good understanding of how
 much it is.
