

ASCII2HEX(1)

ASCII2HEX(1)

NAME

ascii2hex - converts ascii characters to a string of hex integers

SYNOPSIS

ascii2hex < infile > outfile

DESCRIPTION

ascii2hex is a simple program that can be used to convert a string of ascii characters into hex numbers. The resulting file can then be used to program a PROM. See dat2ntl for the additional material that needs to be inserted prior to generating a file with which to program the PROM.
