

## **Paper Reading Questions**

For each paper, your assignment is two-fold. By 10PM the evening before lecture:

- Submit your answer for each lecture's paper question via the submission web site in a file named `lecn.txt`, and
- Submit your own question about the paper (e.g., what you find most confusing about the paper or the paper's general context/problem) in a file named `sqn.txt`. You cannot use the question below. To the extent possible, during lecture we will try to answer questions submitted the evening before.

### **Lecture 12**

Steve Bellovin's "A Look Back" paper was published in 2004, almost 10 years ago (and the paper itself is a retrospective on his earlier paper from 1989). Which of the security problems in the TCP/IP protocol suite described in Steve Bellovin's paper are still relevant today?
