

## **Paper Reading Questions**

For each paper, your assignment is two-fold. By 10PM the evening before lecture:

- Submit your answer for each lecture's paper question via the submission web site in a file named `lec n . txt`, and
- Submit your own question about the paper (e.g., what you find most confusing about the paper or the paper's general context/problem) in a file named `sq n . txt`. You cannot use the question below. To the extent possible, during lecture we will try to answer questions submitted the evening before.

## **Lecture 20**

The paper mentions that typical Android applications execute on top of a Java virtual machine. What is the role of Java in ensuring overall security?
