

Paper Reading Questions

For each paper, your assignment is two-fold. By 10PM the evening before lecture:

- Submit your answer for each lecture's paper question via the submission web site in a file named `lecn.txt`, and
- Submit your own question about the paper (e.g., what you find most confusing about the paper or the paper's general context/problem) in a file named `sqn.txt`. You cannot use the question below. To the extent possible, during lecture we will try to answer questions submitted the evening before.

Lecture 21

Would it be reasonable to run TaintDroid to track what data applications may be exfiltrating from your phone at all times? Would it be reasonable to use TaintDroid to enforce policies like “no application can send my IMEI to the Internet”? Explain why or why not, and what changes would be needed to make TaintDroid applicable, if not.
