

Income Statement: Results of Operating Performance

15.501/516 **Accounting**

Spring 2004

Professor S. Roychowdhury

Sloan School of Management

Massachusetts Institute of Technology

Feb 11, 2004

Some administrative matters again (sigh!)

- Assignments 1 and 2: due next
Wednesday, Feb 18th
- Next class: as per MIT schedule,
Tuesday Feb 17th

Should we recognize the asset?

Assets arise from transactions and events

- A firm issues a \$12m check to an insurance company for liability insurance over the next year.
- A firm issues a check for \$500K as a deposit on a custom-built machine.
- A firm buys stock in another firm for \$325K
- A firm acquires chemicals to be used as raw materials for \$800K.

Should we recognize the asset?

Assets arise from transactions and events

- A well-known scientist is hired to manage the R&D function for 480K a year. Employment starts next month.
- The firm receives an order for \$15K in products.
- The firm writes a check for \$1M to obtain an option to purchase a tract of land.
- A firm receives notice from a supplier that it has shipped raw materials of \$200K. The firm has title to the goods while in transit.
- The firm purchases a patent from its creator for \$1.2M

Should we recognize the liability?

Liabilities arise from transactions and events

- The firm owes its attorneys \$50K in legal expenses.
- The firm provides warranties on its products.
- The firm borrows \$60K from the bank for a 90-day period.

Accounting Transactions

- What business transactions are recorded in the financial accounting system?
 - Exchange of assets and liabilities with other entities
 - As opposed to “executory” transactions
 - Supplier: I will supply 5,000 units six months from now.
 - Customer: I will pay when I receive the goods
 - Exchange of promises
- How do transactions affect the accounting equation?
 - The accounting identity is always maintained

Transactions and the Accounting Equation

| | | | | | | | | | | |
|-------------|----------|------------|----------|---------------|----------|------------|----------|----------------|----------|------------|
| Cash | + | A/R | + | Equip. | = | L/P | + | C. Cap. | + | R/E |
| +10,000 | | | | | | | | +10,000 | | |

(2) The company borrows \$3,000 from a bank

- $\text{Assets} = \text{Liabilities} + \text{Owners' Equity}$
- Cash Loans Payable
- +\$3,000 +\$3,000

Transactions and the Accounting Equation

| Cash | + | A/R | + | Equip. | = | L/P | + | C. Cap. | + | R/E |
|-------------|----------|------------|----------|---------------|----------|------------|----------|----------------|----------|------------|
| +10,000 | | | | | | | | +10,000 | | |
| + 3,000 | | | | | | + 3,000 | | | | |

(3) Company purchases equipment for \$5,000 cash

■ Assets = L + OE

■ Cash Equipment

■ -\$5,000 +\$5,000

Transactions and the Accounting Equation

| Cash | + | A/R | + | Equip. | = | L/P | + | C. Cap. | + | R/E |
|---------|---|-----|---|---------|---|---------|---|---------|---|-----|
| +10,000 | | | | | | | | +10,000 | | |
| + 3,000 | | | | | | + 3,000 | | | | |
| - 5,000 | | | | + 5,000 | | | | | | |

**(4) Company performs service for \$12,000.
The customer pays \$8,000 in cash and
promises to pay the balance at a later date.**

| | | | | |
|------------|---|-------------|---|-------------------|
| ■ Assets | = | L | + | Owners' Equity |
| ■ Cash | | Receivables | | Retained Earnings |
| ■ +\$8,000 | | +4,000 | | +\$12,000 |

Transactions and the Accounting Equation

| Cash | + | A/R | + | Equip. | = | L/P | + | C. Cap. | + | R/E |
|---------|---|---------|---|---------|---|---------|---|---------|---|---------|
| +10,000 | | | | | | | | +10,000 | | |
| + 3,000 | | | | | | + 3,000 | | | | |
| - 5,000 | | | | + 5,000 | | | | | | |
| + 8,000 | | + 4,000 | | | | | | | | +12,000 |

Transactions and the Accounting Equation

| Cash | + | A/R | + | Equip. | = | L/P | + | C. Cap. | + | R/E |
|-------------|----------|------------|----------|---------------|----------|------------|----------|----------------|----------|------------|
| +10,000 | | | | | | | | +10,000 | | |
| + 3,000 | | | | | | + 3,000 | | | | |
| - 5,000 | | | | + 5,000 | | | | | | |
| + 8,000 | | + 4,000 | | | | | | | | +12,000 |
| - 9,000 | | | | | | | | | | - 9,000 |

Transactions and the Accounting Equation

| Cash | + | A/R | + | Equip. | = | L/P | + | C. Cap. | + | R/E |
|--------------|---|--------------|---|--------------|---|--------------|---|---------------|---|----------------|
| +10,000 | | | | | | | | +10,000 | | |
| + 3,000 | | | | | | + 3,000 | | | | |
| - 5,000 | | | | + 5,000 | | | | | | |
| + 8,000 | | + 4,000 | | | | | | | | +12,000 |
| - 9,000 | | | | | | | | | | - 9,000 |
| - 1,000 | | | | | | | | | | - 1,000 |
| 6,000 | | 4,000 | | 5,000 | | 3,000 | | 10,000 | | + 2,000 |

Balance Sheet as at December 31, 1997

| Assets | Amount | Liabilities and Owners' Equity | Amount |
|-------------------------|-----------------|---|-----------------|
| Cash | 6,000 | Loans Payable | 3,000 |
| Receivables | 4,000 | Contributed Capital | 10,000 |
| Equipment | 5,000 | Retained Earnings | 2,000 |
| | <hr/> | | <hr/> |
| Total Assets | \$15,000 | Total Liabilities and Owners' Equity | \$15,000 |
| | <hr/> | | <hr/> |

Transactions and Accounting Equation

| Cash | + A/R | + Equip. | = L/P | + C. Cap. | + R/E |
|---------|---------|----------|---------|-----------|----------------|
| +10,000 | | | | +10,000 | |
| + 3,000 | | | + 3,000 | | |
| - 5,000 | | + 5,000 | | | |
| + 8,000 | + 4,000 | | | | +12,000 |
| - 9,000 | | | | | - 9,000 |
| - 1,000 | | | | | - 1,000 |
| 6,000 | 4,000 | 5,000 | 3,000 | 10,000 | + 2,000 |

Income Statement

For the year ended December 31, 1997

| | |
|---|------------------------|
| Revenues: Fees earned for service | \$12,000 |
| Expenses: Wages, interest, maintenance | <u>\$ 9,000</u> |
| Net income | <u>\$ 3,000</u> |

Transactions and Accounting Equation

| Cash | + A/R | + Equip. | = L/P | + C. Cap. | + R/E |
|----------|---------|----------|---------|-----------|---------|
| + 10,000 | | | | +10,000 | |
| + 3,000 | | | + 3,000 | | |
| - 5,000 | | + 5,000 | | | |
| + 8,000 | + 4,000 | | | | +12,000 |
| - 9,000 | | | | | - 9,000 |
| - 1,000 | | | | | - 1,000 |
| 6,000 | 4,000 | 5,000 | 3,000 | 10,000 | + 2,000 |

Statement of Cash Flows

For the year ended December 31, 1997

[To be revisited later in the course]

Operating activities:

| | | |
|------------------------------------|----------------|---------|
| Sale of a service (4) | 8,000 | |
| Payments for expenses (5) | <u>(9,000)</u> | |
| Net cash from operating activities | | (1,000) |

Investing activities:

| | | |
|------------------------------------|----------------|---------|
| Purchase of equipment (3) | <u>(5,000)</u> | |
| Net cash from investing activities | | (5,000) |

Financing activities:

| | | |
|--------------------------|----------------|---------------|
| Borrowings (2) | 3,000 | |
| Owner contributions (1) | 10,000 | |
| Payment of dividends (6) | <u>(1,000)</u> | <u>12,000</u> |

Increase in cash balance

6,000

Cash balance at the beginning of the year

0

Cash balance at the end of the year

6,000

Statement of Retained Earnings

For the year ended December 31, 1997

| | |
|--|------------------------|
| Beginning retained earnings balance | 0 |
| Plus: Net income | 3,000 |
| Less: Dividend to stockholder | <u>1,000</u> |
| Ending retained earnings balance | <u>\$ 2,000</u> |

Summary

- **Balance sheet**

- Listing of

- Resources owned by a firm (assets or investments)
- Financing of the assets through obligations to external parties (liabilities)
- Financing of the investments through residual claimants (shareholders' equity)

- Preparing a balance sheet (and other financial statements) using transaction history

Chapter 3: Income Statement

Accounting in a “one-period” world

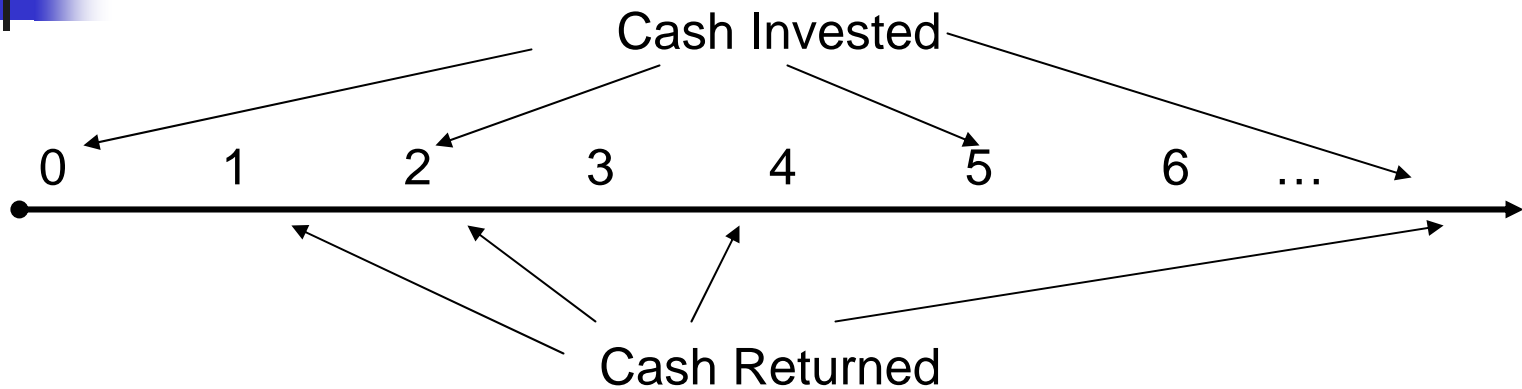

- Cash
Invested

+ Cash
Returned

0 ●—————● 1

- Example: Shipping Expeditions in the 15th Century
- Ship sold at the end of a voyage: Finite project life
- No information flow from time ship left port until it returned
- Performance: Discounted Cash Flow (DCF)

Accounting in a “multi-period” world

- No pre-determined end to a firm's life - going concern
- Cash invested and generated at multiple points in time
- Subsequent actions affected by prior results - feedback

Principles in Preparing Financial Statements: Fiscal Period

- Artificially divide the life of an organization into annual periods for the purpose of financial reporting.
 - SEC requires quarterly reporting.
 - Internationally, trend toward quarterly reporting
- Why is there a demand for periodic performance measures?
 - Valuation
 - Evaluate management performance
 - Reward management
 - Decide whether to continue to trust the firm's assets with the current management
- Ideally, all the relevant information with respect to a firm's performance should be in the quarterly report on a timely basis. Is that the case?

Financial Accounting Principles: Objectivity and Conservatism

- **Objectivity:** financial accounting information must be verifiable and reliable.
- **Conservatism**
 - Asymmetry in the treatment of gains and losses
 - Greater degree of verification for gains than for losses
 - Required by GAAP, but arose voluntarily. Why?
 - Management's incentive to report good information, hide bad information
 - Asymmetric payoff to bondholders
 - Credibility of information in valuation
 - Conservatism **does not** suggest that financial statements should **arbitrarily** understate assets and overstate liabilities.

Income Statement: Results of Operating Performance

- Revenues -- Sales or service revenue
- Gains -- e.g., selling an equipment for cash greater than its net book value
- Expenses -- Cost of goods sold, operating expenses, etc.
- Losses
- Other revenues and expenses
 - Interest revenue, dividend income, interest expense for a manufacturing or merchandising firm.

Income Statement: Results of Operating Performance

- The income statement measures **firm performance** regardless of when cash is exchanged. Toward this end, two key principles are
 - Revenue Recognition:
 - Earnings process substantially complete
 - Cash collection reasonably assured
 - Conservatism principle is applicable
 - The **Matching Principle** for Expenses:
 - Match *efforts* to the benefits generated
 - Capitalize expenditures that will benefit future periods, expense as benefits are realized
 - Recognize liabilities when efforts benefiting the current period require cash payment in the future
 - Produces a difference between cash flows and earnings

Matching Example

- Blockbuster video buys a copy of the **Matrix Reloaded** video for \$20.
- Experience indicates that video will be rented:

Year1
50x

Year2
17x

- How much should Blockbuster recognize as an expense each year?

Matching Example

Estimate: $\frac{\text{Year1}}{50x}$ $\frac{\text{Year2}}{17x}$

How much should Blockbuster recognize as an expense each year?

$$\frac{50}{67}$$

$$\frac{17}{67}$$

 **(50+17)**

Matching Example

Estimate: $\frac{\text{Year1}}{50x}$ $\frac{\text{Year2}}{17x}$

How much does Blockbuster recognize as an expense each year?

$$\frac{50}{67} (\$20)$$

$$\frac{17}{67} (\$20)$$

**Yearly
Expenses**

\$15

\$5

Matching Example

| | | | |
|--------------------|--------------|--------------|--------------|
| | <u>Year1</u> | <u>Year2</u> | <u>Year3</u> |
| Estimate 2: | 50% | 25% | 25% |

Matching Example

| | <u>Year1</u> | <u>Year2</u> | <u>Year3</u> |
|--------------------|--------------|--------------|--------------|
| Estimate 2: | 50% | 25% | 25% |

**Yearly
Expenses**

\$10

\$5

\$5

| End of Y3 | | (5) | (5) |
| Total video expenses = | \$20 | \$20 | |

What is Cost of Goods Sold?

- Q Mart buys \$10,000 worth of cereals from Special Foods for cash.
- Assets = L + OE
- Exchange of one asset for another asset
- Operating outflow = \$10,000

What is Cost of Goods Sold?

- Q Mart sold one-half of the cereals for \$8,000 cash
- Assets = L + Owners' Equity
- What is the most significant **matching** expense?

What is Cost of Goods Sold?

- The cost to Q Mart of buying the cereal that was sold for \$8,000
-
- = Cost of Goods Sold or Cost of Sales
- $\text{Assets} = \text{L} + \text{Owners' Equity}$

What is Gross Profit or Margin?

- Assets = L + Owners' Equity
- Cash Inventory Retained Earnings

- Increase in retained earnings
- Gross Profit or Margin = Sales Revenue (-)
Cost of Goods Sold =
- **GM rate** =

Components of Income

- Sales or Service Revenue
- (-) Cost of Goods Sold
- (-) Operating Expenses
- (-) Unusual or Infrequent items
- (-) Income Tax Expense
- = Income from Continuing Operations (ICO)
- All items disclosed below ICO are referred to as “below the line” items.
- The below-the-line items are each shown net of income tax.

Components of Income - Staples

| | |
|---|-------------------|
| ■ Sales | 11,596,075 |
| ■ Cost of goods sold& Occupancy costs | 08,652,593 |
| ■ Gross Profit | 02,943,482 |
| ■ <u>Operating expenses</u> | |
| ■ Operating & selling | 01,795,428 |
| ■ Pre-opening | 00,008,746 |
| ■ General & administrative | 00,454,501 |
| ■ Amortization on intangibles | 00,002,135 |
| ■ Amortization on goodwill | 0 |
| ■ Asset impairment charges | 0 |
| ■ Store closure charge | 0 |
| ■ Interest & other expenses | 00,020,609 |
| ■ Total operating & other expenses | 02,281,419 |
| ■ Income before taxes | 00,662,063 |
| ■ Income taxes | 00,215,963 |
| ■ Net income | 00,446,100 |

Components of Income

- Income from Continuing Operations
- Discontinued Operations
 - Income or Loss from Discontinued Operations
 - Gain or Loss on Disposal of Discontinued Operations
- Extraordinary Items (Unusual **and** Infrequent)
- Cumulative Effect of Change in Accounting Principles

Advantages of Income Statement Components

- Forecasting future performance
- Distinguish between **core operating performance** (recurring items) versus **transitory components** (unusual and/or infrequent items)
- Disclosure on Discontinued Operations
- An example: Firm A has two business segments, i.e., M & N.
- In 1997, A's total income was \$100,000 (M earned \$70,000 and N earned \$ 30,000)
- All numbers are assumed after tax

Advantages of Income Statement Components

- 1997 Net Income (= ICO) = \$100,000
- In 1998, the total income was \$100,000 also.
- M earned \$90,000 income whereas N earned only \$10,000.
- **On December 31, 1998**, Firm A **decides** to discontinue the business segment N.
- It **expects to lose** \$15,000 by disposing off the assets of N.
- i.e., it will generate \$15,000 less cash compared to the net book value of the assets of segment N.

Advantages of Income Statement Components

- What would Firm A disclose in its 1998 financial statements?
- Usually comparative statements are provided
- | | 1998 | 1997 |
|------------------------------|----------|----------|
| ■ Income from Cont. Ops. | \$90,000 | \$70,000 |
| ■ Income from Disc. Ops. | 10,000 | 30,000 |
| ■ Loss on sale of Disc. Ops. | (15,000) | |
| ■ Net Income | 85,000 | 100,000 |

Summary

- Key principles underlying financial statement preparation
 - Objectivity
 - Conservatism
 - Matching
 - Revenue recognition
- Income statement
 - Preparing an income statement from transaction history
 - Presentation
 - Information in components of income
